Group Theory: Birdtracks, Lie's, and Exceptional Groups Predrag Cvitanovic

If classical Lie groups preserve bilinear vector norms, what Lie groups preserve trilinear, quadrilinear, and higher order invariants? Answering this question from a fresh and original perspective, Predrag Cvitanovic takes the reader on the amazing, four-thousand-diagram journey through the theory of Lie groups. This book is the first to systematically develop, explain, and apply diagrammatic projection operators to construct all semi-simple Lie algebras, both classical and exceptional.

The invariant tensors are presented in a somewhat unconventional, but in recent years widely used, "birdtracks" notation inspired by the Feynman diagrams of quantum field theory. Notably, invariant tensor diagrams replace algebraic reasoning in carrying out all group-theoretic computations. The diagrammatic approach is particularly effective in evaluating complicated coefficients and group weights, and revealing symmetries hidden by conventional algebraic or index notations. The book covers most topics needed in applications from this new perspective: permutations, Young projection operators, spinorial representations, Casimir operators, and Dynkin indices. Beyond this well-traveled territory, more exotic vistas open up, such as "negative dimensional" relations between various groups and their representations. The most intriguing result of classifying primitive invariants is the emergence of all exceptional Lie groups in a single family, and the attendant pattern of exceptional and classical Lie groups, the so-called Magic Triangle. Written in a lively and personable style, the book is aimed at researchers and graduate students in theoretical physics and mathematics.

From reader reviews:

Patricia Kirby:

As people who live in often the modest era should be up-date about what going on or data even knowledge to make these keep up with the era that is certainly always change and advance. Some of you maybe will certainly update themselves by reading through books. It is a good choice for you personally but the problems coming to anyone is you don't know which you should start with. This Group Theory: Birdtracks, Lie's, and Exceptional Groups is our recommendation to cause you to keep up with the world. Why, since this book serves what you want and wish in this era.

Rosa Goldschmidt:

A lot of people always spent their particular free time to vacation or perhaps go to the outside with them loved ones or their friend. Are you aware? Many a lot of people spent they free time just watching TV, or perhaps playing video games all day long. In order to try to find a new activity here is look different you can read a new book. It is really fun for you personally. If you enjoy the book you read you can spent the entire day to reading a reserve. The book Group Theory: Birdtracks, Lie's, and Exceptional Groups it is very good to read. There are a lot of people who recommended this book. They were enjoying reading this book. When you did not have enough space to create this book you can buy the e-book. You can m0ore simply to read this book from a smart phone. The price is not too costly but this book features high quality.

Terry Crabtree:

The book untitled Group Theory: Birdtracks, Lie's, and Exceptional Groups contain a lot of information on that. The writer explains your girlfriend idea with easy approach. The language is very straightforward all the people, so do not necessarily worry, you can easy to read the item. The book was compiled by famous author. The author brings you in the new time of literary works. It is easy to read this book because you can read more your smart phone, or product, so you can read the book in anywhere and anytime. If you want to buy the e-book, you can available their official web-site and order it. Have a nice go through.

Lesley Dwyer:

A lot of e-book has printed but it takes a different approach. You can get it by net on social media. You can choose the most beneficial book for you, science, amusing, novel, or whatever simply by searching from it. It is known as of book Group Theory: Birdtracks, Lie's, and Exceptional Groups. You can include your knowledge by it. Without leaving the printed book, it could possibly add your knowledge and make you actually happier to read. It is most crucial that, you must aware about reserve. It can bring you from one spot to other place.
