Towards the Future of Fuzzy Logic (Studies in Fuzziness and Soft Computing)

This book provides readers with a snapshot of the state-of-the art in fuzzy logic. Throughout the chapters, key theories developed in the last fifty years as well as important applications to practical problems are presented and discussed from different perspectives, as the authors hail from different disciplines and therefore use fuzzy logic for different purposes. The book aims at showing how fuzzy logic has evolved since the first theory formulation by Lotfi A. Zadeh in his seminal paper on Fuzzy Sets in 1965. Fuzzy theories and implementation grew at an impressive speed and achieved significant results, especially on the applicative side. The study of fuzzy logic and its practice spread all over the world, from Europe to Asia, America and Oceania. The editors believe that, thanks to the drive of young researchers, fuzzy logic will be able to face the challenging goals posed by computing with words. New frontiers of knowledge are waiting to be explored. In order to motivate young people to engage in the future development of fuzzy logic, fuzzy methodologies, fuzzy applications, etc., the editors invited a team of internationally respected experts to write the present collection of papers, which shows the present and future potentials of fuzzy logic from different disciplinary perspectives and personal standpoints.

From reader reviews:

Jesse Valles:

Nowadays reading books are more than want or need but also become a life style. This reading habit give you lot of advantages. The advantages you got of course the knowledge the rest of the information inside the book this improve your knowledge and information. The info you get based on what kind of reserve you read, if you want send more knowledge just go with schooling books but if you want truly feel happy read one together with theme for entertaining like comic or novel. The Towards the Future of Fuzzy Logic (Studies in Fuzziness and Soft Computing) is kind of guide which is giving the reader unstable experience.

Peter Barba:

Information is provisions for individuals to get better life, information these days can get by anyone on everywhere. The information can be a information or any news even a problem. What people must be consider if those information which is inside former life are challenging be find than now could be taking seriously which one is suitable to believe or which one the particular resource are convinced. If you have the unstable resource then you buy it as your main information there will be huge disadvantage for you. All of those possibilities will not happen with you if you take Towards the Future of Fuzzy Logic (Studies in Fuzziness and Soft Computing) as the daily resource information.

Kathy Graves:

In this era globalization it is important to someone to find information. The information will make someone to understand the condition of the world. The condition of the world makes the information better to share. You can find a lot of recommendations to get information example: internet, newspapers, book, and soon.
