Organizational Behavior 2: Essential Theories of Process and Structure John B. Miner

This comprehensive text provides a detailed review and analysis of the building-block theories in the macro-organizational behavior field.

John Miner has identified the key theories that any student or scholar needs to understand to be considered literate in the discipline. Each chapter includes the background of the theorist represented, the context in which the theory arose, the initial and subsequent theoretical statements, research on the theory by the theory's author and others (including meta-analysis and reviews), and practical applications.

Special features, including boxed summaries of each theory at the beginning of each chapter; two introductory chapters on the scientific method and the development of knowledge; and detailed, comprehensive references, help make this text especially useful for every student and scholar in the field.
