The Spychips Threat: Why Christians Should Resist RFID and Electronic Surveillance Katherine Albrecht, Liz McIntyre

Ever feel like you're being watched? This eye-opening book shows how a new technology may soon track your every move . . . and pave the way for the fulfillment of end-time biblical prophecy.

A revolutionary technology called RFID (Radio Frequency IDentification) is poised to expose our habits, secrets, and slip-ups to money-hungry marketers, savvy criminals, and government snoops. One day soon, our shoes could keep track of our footsteps. Stores could ID us as we walk in the door. Hidden "tracking units" could log even our restroom visits.

Global corporations and government agencies have already invested millions in a plan that uses tiny microchips to uniquely number and track everyday items. Parts of this Orwellian vision are uncannily similar to the prophecies of Revelation. Chipping inanimate objects is just the start-the endpoint is a form of RFID that can be injected into the flesh. This work-an updated version of Katherine Albrecht and Liz McIntyre's controversial and award-winning book *Spychips*-is a clarion call to Christians to take a stand against plans to monitor and control people through this unnerving new technology.

Using public records, real-world examples, and biblical prophecies, Albrecht and McIntyre uncover the frightening story behind RFID and show us how to protect our privacy and civil liberties while there's still time.
