**Economics and Politics of Trade Policy (World Scientific Studies in International Economics)** Douglas Russell Nelson

*Economics and Politics of Trade Policy* brings together a set of 16 papers that focus primarily on the political economy of international trade. What sets these papers apart is the recurrent theme of developing and extending political economic analysis beyond details commonly considered when the papers were written. The book takes a deeper look at institutional and behavioral details that researchers have formerly overlooked, delving into issues such as administered rather than legislated protection; incorporation of unemployment; and behavioral considerations such as fairness. Together with a few other papers that consider theoretic issues of trade, this book will provide a thought-provoking overview of the most important research on international trade, political economy and policy over the past decades.

Readership: Professionals, graduate students and researchers in the fields of international trade, political economy and international trade policy.
