The Sirius Mystery: New Scientific Evidence of Alien Contact 5,000 Years Ago Robert Temple

Convincing evidence that the Egyptian, Sumerian, and Dogon civilizations were founded by aliens from the Sirius star system who are now ready to return

- Updated with 140 pages of new scientific evidence that solidifies the hypothesis that the KGB, CIA, and NASA attempted to suppress
- An awe-inspiring work of research that calls for a profound reappraisal of our role in the universe
- Over 10,000 copies sold in its first two months of release in Britain

Publication of *The Sirius Mystery* in 1976 set the world abuzz with talk of an extraterrestrial origin to human civilization and triggered a 15-year persecution campaign against Robert Temple by the KGB, CIA, NASA, and other government agencies. Undaunted, however, Temple is back, with 140 pages of new scientific evidence that makes his hypothesis more compelling than ever.

Many authors have speculated on the subject of extraterrestrial contact, but never before has such detailed evidence been presented. Temple applies his in-depth knowledge of ancient history, mythology, Pythagorean physics, chaos theory, and Greek, to a close examination of the measurements of the Great Pyramid of Giza, which was built to align directly with the star Sirius. He concludes that the alien civilization of Sirius and our own civilization are part of the same harmonic system, and are destined to function and resonate together. His findings warrant a profound reappraisal of our role in the universe.
