Developing and Extending Sustainable Agriculture: A New Social Contract (Sustainable Food, Fiber, and Forestry Systems)

Get the latest sustainable agriculture practices and keep an eye on the future

Developing and Extending Sustainable Agriculture: A New Social Contract explores the challenges faced by today's farmers and ranchers to provide practical strategies to develop a twenty-first century system of sustainable agriculture that is economically sound, environmentally compatible, and socially acceptable. This comprehensive look at the current state of farming and ranching presents leading authorities discussing concepts and approaches in sustainable agriculture such as crop rotations, integrated pest management, alternative sources of nutrients to maintain productivity, and rotational grazing systems.

Presently there is a trend toward a more industrial agriculture and a global food system that will bring long-term negative impacts. If farmers look thoughtfully toward the future, alternatives are now available to help solve these problems to provide agricultural sustainability for generations to come. Developing and Extending Sustainable Agriculture: A New Social Contract provides a model for integrated research and outreach to everyone interested in sustainable development. A sensible framework of practical short-term strategies are combined with visionary long-term plans to provide viable approaches to sustain agriculture, secure our food system, and develop a more equitable society for the future. The text includes several tables and figures, extensive references, and comprehensive bibliographies.

Topics in Developing and Extending Sustainable Agriculture: A New Social Contract include:
