Habitat loss and fragmentation arguably pose the greatest threats to biological diversity. Agriculture is a dominant land use that, along with urban sprawl and residential development, can reduce the amount and connectedness of natural areas required by many native species. Unfortunately, progress has been slow in integrating nature and biodiversity protection into community planning in intensively farmed regions, especially in America's heartland. Seldom do issues related to species conservation receive consideration during local planning activities. Lack of progress stems partly from scientific inadequacies in understanding the dynamics of complex landscapes, and from a lack of engagement of non-scientific stakeholders by scientists and modelers. The result of these shortcomings is a critical disconnect of conservation issues from the planning infrastructure. This book provides a blueprint for advancing conceptual understanding of conservation in agricultural regions. It accomplishes this with a two-pronged approach: first, by developing spatially structured models that acknowledge the link between socio-economic drivers of land-use change and the dynamics of species occupying agricultural landscapes with abrupt changes in land cover (i.e., sharp edges); and second, by providing guidelines and examples to enable scientists to effectively engage stakeholders in participatory learning and planning activities that integrate biodiversity with other, more traditional considerations. The structure of the book is truly interdisciplinary, linking the efforts of ecologists, economists, statisticians, mathematicians, and land-use specialists.

### **From reader reviews:**

#### **Marcia Eberhart:**

Here thing why this kind of Conserving Biodiversity in Agricultural Landscapes: Model based Planning Tools are different and dependable to be yours. First of all reading a book is good nonetheless it depends in the content of the usb ports which is the content is as yummy as food or not. Conserving Biodiversity in Agricultural Landscapes: Model based Planning Tools giving you information deeper as different ways, you can find any e-book out there but there is no e-book that similar with Conserving Biodiversity in Agricultural Landscapes: Model based Planning Tools. It gives you thrill studying journey, its open up your eyes about the thing this happened in the world which is perhaps can be happened around you. You can actually bring everywhere like in park your car, café, or even in your approach home by train. If you are having difficulties in bringing the paper book maybe the form of Conserving Biodiversity in Agricultural Landscapes: Model based Planning Tools in e-book can be your alternative.

#### **Erna Taylor:**

Do you one among people who can't read enjoyable if the sentence chained inside straightway, hold on guys this particular aren't like that. This Conserving Biodiversity in Agricultural Landscapes: Model based Planning Tools book is readable by simply you who hate those straight word style. You will find the facts here are arrange for enjoyable reading through experience without leaving actually decrease the knowledge that want to deliver to you. The writer regarding Conserving Biodiversity in Agricultural Landscapes: Model based Planning Tools content conveys thinking easily to understand by many individuals. The printed and e-book are not different in the content material but it just different in the form of it. So , do you nonetheless thinking Conserving Biodiversity in Agricultural Landscapes: Model based Planning Tools is not loveable to be your top listing reading book?

#### **Charles Barton:**

In this period of time globalization it is important to someone to get information. The information will make anyone to understand the condition of the world. The fitness of the world makes the information easier to share. You can find a lot of recommendations to get information example: internet, paper, book, and soon. You will observe that now, a lot of publisher in which print many kinds of book. The particular book that recommended to you is Conserving Biodiversity in Agricultural Landscapes: Model based Planning Tools this book consist a lot of the information from the condition of this world now. This specific book was represented how does the world has grown up. The dialect styles that writer use for explain it is easy to understand. The writer made some analysis when he makes this book. That is why this book suited all of you.

#### **Martin Duval:**

As a college student exactly feel bored to reading. If their teacher inquired them to go to the library or to

make summary for some e-book, they are complained. Just minor students that has reading's internal or real their pastime. They just do what the professor want, like asked to the library. They go to right now there but nothing reading seriously. Any students feel that reading through is not important, boring as well as can't see colorful pics on there. Yeah, it is for being complicated. Book is very important in your case. As we know that on this time, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country. So , this Conserving Biodiversity in Agricultural Landscapes: Model based Planning Tools can make you really feel more interested to read.
