A gift for his wife, Jay Wright's *Polynomials and Pollen* explores the complementary exigencies of abstraction and physicality. In five sections, each arranged under the aegis of a tutelary concept—from the Yoruba, Akan, Bamana, and Náhuatl—the book is a constellation of protophilosophical inquiry into notions of order, disarray, evidence, flowering, and return; it is also a dynamically visceral work whose feelingtones register rage as well as devotion.
