## 150 ECG Problems, 4e John R. Hampton DM MA DPhil FRCP FFPM FESC

This book offers 150 12-lead ECGs and rhythm strips, each with a clinical case history and question. The full ECG is reproduced and a study of it with the case history should be enough to give an answer. On the back the case is examined, with a description of the main features of the ECG along with a clinical interpretation and a "what to do" section. The cases are graded in difficulty.

*"I would highly recommend it, not only for my younger colleagues and students, but also to colleagues in different specialties."* **Reviewed by** Perfusion, Apr 2015

For this Fourth Edition over 30 new ECGs have been included, mainly to provide clearer examples, though the book deliberately retains some technically poor records to maintain a 'real-world' perspective.
