Attention Deficit Disorder Sourcebook: Basic Consumer Health Information About Attention Deficit/Hyperactivity Disorder in Children and Adults (Health Reference Series) Dawn D. Matthews

Approximately 3 to 5 percent of school age children are diagnosed with Attention Deficit/Hyperactivity Disorder. It is a very complex condition and the symptoms may differ between one person with AD/HD to another. The symptoms usually appear before age six and may get worse over time. AD/HD affects every part of a child's life, and the associated problems can lead to a lonely and misunderstood child. There is no cure for AD/HD, but there are ways you can relieve the symptoms.

This Sourcebook contains helpful information about the symptoms, diagnosis, and causes of Attention Deficit/Hyperactivity Disorder. It discusses the different types of AD/HD and the available treatments including behavior therapy, parent training, AD/HD coaching, and medications. In addition, it offers a glossary of related terms, information on legal issues, and a list of resources for further help and information.

Rebbeca Farley:

As a university student exactly feel bored for you to reading. If their teacher asked them to go to the library as well as to make summary for some publication, they are complained. Just tiny students that has reading's soul or real their leisure activity. They just do what the educator want, like asked to go to the library. They go to at this time there but nothing reading really. Any students feel that looking at is not important, boring as well as can't see colorful images on there. Yeah, it is for being complicated. Book is very important for you personally. As we know that on this period, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. Therefore this Attention Deficit Disorder Sourcebook: Basic Consumer Health Information About Attention Deficit/Hyperactivity Disorder in Children and Adults

(Health Reference Series) can make you feel more interested to read.
