Speech Enhancement: Theory and Practice (Signal Processing and Communications)

Philipos C. Loizou

Speech Enhancement: Theory and Practice (Signal Processing and Communications) Philipos C. Loizou

The first book to provide comprehensive and up-to-date coverage of all major speech enhancement algorithms proposed in the last two decades, **Speech Enhancement: Theory and Practice** is a valuable resource for experts and newcomers in the field. The book covers traditional speech enhancement algorithms, such as spectral subtraction and Wiener filtering algorithms as well as state-of-the-art algorithms including minimum mean-squared error algorithms that incorporate signal-presence uncertainty and subspace algorithms that incorporate psychoacoustic models. The coverage includes objective and subjective measures used to evaluate speech quality and intelligibility.

Divided into three parts, the book presents the digital-signal processing and speech signal fundamentals needed to understand speech enhancement algorithms, the various classes of speech enhancement algorithms proposed over the last two decades, and the methods and measures used to evaluate the performance of speech enhancement algorithms. The text is supplemented with examples and figures designed to help readers understand the theory. MATLAB® implementations of all major speech enhancement algorithms and a speech database that can be used for evaluation of noise reduction algorithms are available for download on the book's description page at the CRC Press website.

Providing clear and concise coverage of the subject, the author brings together a large body of knowledge about how human listeners compensate for acoustic noise when in noisy environments. This book is a valuable resource not only for engineers who want to implement the latest speech enhancement algorithms but also for speech practitioners who want to incorporate some of these algorithms into hearing aid applications for speech intelligibility and/or quality improvement.

A download is available for those that purchase this book and can be obtained by contacting nora.konopka@taylorandfrancis.com, providing proof of purchase.

From reader reviews:

Lucia Morrone:

Often the book Speech Enhancement: Theory and Practice (Signal Processing and Communications) has a lot of knowledge on it. So when you read this book you can get a lot of gain. The book was authored by the very famous author. The writer makes some research previous to write this book. This particular book very easy to read you will get the point easily after looking over this book.

Wanda Stamper:

Are you kind of stressful person, only have 10 or even 15 minute in your day time to upgrading your mind proficiency or thinking skill also analytical thinking? Then you are receiving problem with the book when compared with can satisfy your limited time to read it because all of this time you only find reserve that need more time to be study. Speech Enhancement: Theory and Practice (Signal Processing and Communications) can be your answer mainly because it can be read by you actually who have those short time problems.

Benjamin Martinez:

In this age globalization it is important to someone to get information. The information will make someone to understand the condition of the world. The condition of the world makes the information quicker to share. You can find a lot of sources to get information example: internet, classifieds, book, and soon. You can see that now, a lot of publisher that print many kinds of book. Typically the book that recommended to your account is Speech Enhancement: Theory and Practice (Signal Processing and Communications) this reserve consist a lot of the information on the condition of this world now. This book was represented how can the world has grown up. The language styles that writer use to explain it is easy to understand. The actual writer made some investigation when he makes this book. Here is why this book suited all of you.

Brant Castillo:

Reading a publication make you to get more knowledge from the jawhorse. You can take knowledge and information coming from a book. Book is composed or printed or outlined from each source that will filled update of news. In this particular modern era like right now, many ways to get information are available for an individual. From media social including newspaper, magazines, science publication, encyclopedia, reference book, book and comic. You can add your knowledge by that book. Are you hip to spend your spare time to open your book? Or just looking for the Speech Enhancement: Theory and Practice (Signal Processing and Communications) when you essential it?
